Education

Faculty of Engineering, UNAM

B.S. in Computer Engineering (Degree Pending)

Cisco Networking Specialization: CCNP Security Diploma (Jun 2026), CCNP ENCOR & ENARSI, CCNA.

Mexico City

2021 – 2026

Certifications

NVIDIA Deep Learning Institute: Adding New Knowledge to LLMs; Fundamentals of Deep Learning

Nov 2025

CertiProf: Cybersecurity Awareness Professional (CAPC)

Valid through 2027

Projects & Infrastructure

Hybrid Homelab — Self-Hosted Kubernetes Platform (K3s / ARM64)

Personal Project

Infrastructure Administrator

Present

- Migrated over 15 services from Docker to Kubernetes (K3s) on Raspberry Pi 5 (ARM64 / edge) with zero downtime, integrating MariaDB, MySQL, and PostgreSQL with persistent storage via PVCs on NVMe.
- Managed the full infrastructure lifecycle through GitOps (ArgoCD, app-of-apps): Traefik ingress, automated TLS via cert-manager + Cloudflare (DNS-01), and CI with GitHub Actions (multi-arch builds, manifest write-back).
- Designed the network with fault domain isolation: out-of-cluster VPN (WireGuard) and DNS (Pi-hole + Unbound), plus full-stack observability using Prometheus, Grafana, and Loki with automated Slack alerting.

NoNameStore — Cloud-Native Platform (Kubernetes + GitOps)

Personal Project

DevOps & Software Engineer

Present

- Provisioned and hardened (SELinux) a multi-node Kubernetes cluster on Linux (Arch/Rocky) over KVM/QEMU, fully automated end-to-end with Ansible (IaC).
- Built a CI/CD pipeline with Tekton and Kaniko: multi-platform builds triggered by GitHub webhooks, commit-based tagging, and continuous deployment to staging and production via ArgoCD (auto-sync, self-heal) with RBAC.
- Ensured storage persistence (MariaDB) using StatefulSets/NFS and centralized logging with Fluentd + OpenSearch.

Experience

CTIN

Mexico City

QA Automation Specialist

May 2025 – December 2025

- Integrated automated test suites into CI/CD pipelines (Jenkins), significantly reducing manual validation efforts.
- Diagnosed defects across web and mobile environments and documented tracking entries using Agile tools (Jira, Zephyr).

Microsoft Artificial Intelligence Laboratory, UNAM

Mexico City

IT Support & Infrastructure Specialist (Social Service)

December 2023 – December 2024

- Resolved L1/L2 user and IT service incidents, alongside hardware and compute equipment maintenance.
- Diagnosed network issues (L2/L3 troubleshooting via CLI) across LAN and perimeter devices, while managing network monitoring tools.

Skills & Interests

Containers, CI/CD & IaC: Kubernetes (K3s), Docker, Helm, ArgoCD, Tekton, Kaniko, GitHub Actions, Jenkins, Ansible, Git

Observability: Prometheus, Grafana, Loki, Alertmanager, Fluentd, OpenSearch

Networking & Security: Routing (OSPF/BGP), CLI Troubleshooting, WireGuard, Cloudflare DNS, Traefik, cert-manager, Pi-hole/Unbound, Hardening (SSH, Fail2Ban, SELinux), NFS

Systems & Programming: Linux (Arch/Rocky), Bash, Python, Go • Scrum, Kanban, Jira • M365 / Entra ID

Language: Spanish (Native) • English (B1 — Professional Working)
